Services

In light of the increasing demand for qualified programmers in local and regional markets, Orange Jordan took on its shoulders the mission of qualifying a new generation mastering this skill efficiently.
The Coding Academy by Orange was launched in June 2019, in partnership with Simplon.co, to offer a free of charge 6-month training courses in coding languages for free, supported by 1-month internship in ICT sector. Every year 50 students, out of thousands of applicants, get the opportunity to join the Academy after passing a very competitive admission process. The employability rate among the first batch of students exceeded 70% which proves the efficiency of the academy's teaching methodology, curricula and academic staff.
